Summary

Informatics and Computing Engineering graduate from FEUP now working as a Software Engineer, specialising in React-based frontend development with hands-on experience across multiple frameworks and tech stacks. I excel at building intuitive, high-quality interfaces and delivering great user experiences, while thriving in collaborative teams and embracing new challenges. Self-confessed music nerd outside of work.

Work Experience

ARMIS Group

Porto, Portugal

SOFTWARE ENGINEER

Jul. 2025 - Present

- Developing React/Next.js applications, primarily dashboards for energy production optimization, with a focus on real-time data visualization and responsive UI.
- Building Grafana dashboards and custom plugins using React components for critical real-time data display in energy management systems.
- Developing REST APIs backed by a Java/Quarkus backend, ensuring robust and scalable server-side architecture.

ARMIS Group

Porto, Portugal

SOFTWARE ENGINEER INTERN - CAPSTONE PROJECT

Feb. 2025 - Jul. 2025

- Developed a React/Next.js dashboard for renewable energy production optimization, displaying critical real-time data and enabling precise, fast operator actions.
- Integrated a company-provided REST API to simulate real-world energy park operations, including wind farm monitoring and control.
- Built intuitive editors, data tables, and action controls for managing wind farm parameters, delivering a clean and user-friendly interface that met all functional requirements.

PiFusion

Remote

FULL-STACK DEVELOPER INTERN

Jul. 2024 - Dec. 2024

- Developing a React/Next.js dashboard for CNC machine monitoring in bearing production, featuring real-time metrics and a responsive, user-friendly interface.
- Packaging the application as a native desktop app using Tauri, ensuring seamless cross-platform integration.
- Designed with a scalable, component-based architecture and fully responsive layout, designed to accommodate growing production demands and evolving requirements.

Education

Faculty of Engineering of the University of Porto.

Porto, Portugal

BACHELOR IN INFORMATICS AND COMPUTING ENGINEERING

Sep. 2022 - Sep. 2025

- Final grade of 13/20.

Extracurricular Activity

Informatics Division for the Students' Union at the Faculty of Engineering of the University of Porto - NIAEFEUP

Porto, Portugal

HEAD OF THE IMAGE AND COMMUNICATION DEPARTMENT

Jun. 2025 - Present

- Manage the Division's brand identity and produce audiovisual content for social media platforms.
- Lead external representation efforts, coordinating member participation in guided tours at FEUP and events such as SPE and Mostra UP.
- Co-coordinate Python workshops for secondary school students, supporting youth engagement in programming.
